

3RINCS Special Session

Session Title: Global to local challenge on Disaster Waste Management

Organizer: Misuzu ASARI

Session coordinators: two from the team

Outline of the session:

Disaster have become the large threat in all over the world. After the disaster, disaster waste management must be one of the import task to build back better. However, the concept of disaster waste management is still quite new and sounds difficult for many countries to tackle perfectly. That means information and experiences sharing is really important to keep promoting.

This session aims to share the local and global trends and challenges of disaster waste management and to find out the direction to continuous development of this field.

Presenters are parenthesized as follows,
